Real bat skeleton has been preserved in plastic for close-up observation. Durable, clear acrylic allows for viewing from all angles and won't break even if accidentally dropped!

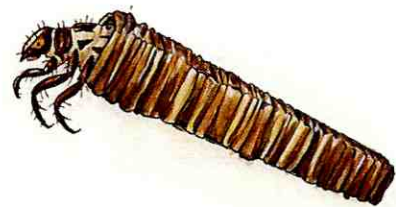

Kindergartener's demonstration of leaping frog game learning what they eat.

After insects have been properly pinned and labeled, they are kept in specially designed insect boxes constructed with soft flooring into which pins can be inserted. Pinned insects cannot be stored in good condition for long unless they are placed in boxes to protect them from dust and damage.

Magnifier Adventure Kit  
Pack contains a pendant magnifier, hand magnifier and pocket magnifier with built-in tweezers.

What am I? Where do I live?
